## Most Rugged Hay Mover on the Market

### Options:

- Standard equipment drive with 2 heavy duty hydraulic motors or PTO drive gear box 540 or 1000 RPM
- Made of heavy duty structural tubing
- Dual tandem 16"-10 ply radial tires with heavy duty 8 bolt hubs and rims
- Hydraulic shift "forward and reverse of chain" for lading and unloading
- Mover wheels will follow tractor wheels for easy trailing and weighing on scales
- Heavy duty hydraulic lift cylinder

### Sizes available:

- 13-15 foot widths, with optional 2 ft. extension
- 29-32 foot lengths
- 17 to 18 ton capacity
- 32 inches off the ground

We can custom-build the Hay Mover to fit behind a pickup or truck or hauling long distances.

- Speed can be changed by changing the sprockets on both hydraulic and PTO double drives.
- Adjust the chains by loosening 3 bolts, turn the eccentric with a wrench and retighten the bolts.
